DETAILED ACTION

This action is made in reference to Applicant's phone call on 8/16-17/04 for the correction of the indication of claims 1-4 and 13-22 are drawn to an invention non-elected without traverse, rather than 1-4 and 12-22 being drawn to an invention non-elected without traverse. This action restarts the time to the mailing of this action.

Applicant's election of Species of figures 1-6, 8 and 9 (claims 5-12) have been acknowledged. However, the election consists of several species still. A further restriction requirement is listed below.

This application contains claims 1-4 and 13-22 drawn to an invention non-elected without traverse.

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, figures 1-5 and 8

Species II, figures 6a and 9a

Species III, figures 7 and 9b.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim in claims 5-12 are generic to all figures.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 2826

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander O Williams whose telephone number is (571) 272 1924. The examiner can normally be reached on M-F 6:30-7:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan Flynn can be reached on (571) 272 1915. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
